

## HW4 Problem 2(c)

Posted Mar 16, 2019 10:04 PM

Dear all

For those who cannot get key-points from the training and/or testing image, please resize all images to a larger size. Please try multiple resizing with different scales and discuss why the difference between them. Hint: 8 may not necessarily be closer to 0 than 1 due to the SIFT feature vectors extracted may come from the scaling artifacts.
