Feedback for Homework#2 report (pdf)
Dropbox Feedback
P1: detailed!

(a)

Insufficient discussion about disadvantages (-1).

(b)

No results for different threshold pairs (-2).

No discussion about threshold effects (-2).

(c)

Y -> Z is in output space (-0); no purpose of structured random forest (-1).

No discussion about parameter effects of sharpen (-1).

(d)

Recall should monotonically decrease (-1).

Your curve distributions vs percentage of edge pixel numbers are abnormal because most of pixels are actually non-edged, it may be better to normalize the edge map for preprocessing (-0).

P2:

2a: good

2b: -1 not fully correct Stucki result, bridge should not have white dots

2c: good!
